Subject: Civil Liability Insurance for the Brazilian Space Agency.

Dear Mr. Murad Mehmet Çakir

1. Cordially, this letter is intended to satisfy the International Astronautical Congress 2026 organization's requirement that exhibitors provide proof of civil liability insurance.

2. Under Brazilian Constitutional Law, the civil liability of federal public entities is governed by the legal framework applicable to the Brazilian State. As a federal public entity, the Brazilian Space Agency (AEB), a federal agency under the Ministry of Science, Technology and Innovation of the Federative Republic of Brazil, is subject to these provisions, which establish and guarantee its liability for any damage arising from its activities and official actions. Therefore, the Agency considers that separate private liability insurance is unnecessary, as its legal responsibility is already fully covered under the applicable Brazilian Legislation. According to Article 37, Paragraph 6 of the Brazilian Constitution, public-law entities and private entities providing public services shall be liable for damages that their agents, acting in their official capacity, caused to third parties, without prejudice to the right of recourse against the responsible agent in cases of willful misconduct or negligence.

3. AEB, in the capacity of exhibitor at the 77th International Astronautical Congress in Antalya, Türkiye, as established by Exhibition Contract n°. PC-09, acknowledges its responsibility and liability for damages caused to third parties exclusively by the acts or omissions of its representatives, or by activities, materials and equipment under its direct control, within the area of the exhibition booth assigned to AEB and during the period specified above. AEB shall be solely responsible and liable for claims arising from the conduct of members of its official delegation or from activities, materials and equipment under its direct control within the AEB exhibition booth. This liability aresponsibility extends to the periods of booth installation and dismantling, from 30 September through 11 October, until 3:00 p.m. (local time). It shall not extend to claims arising from acts or omissions attributable to the Congress organizers, service providers, venue operators, or any other independent third party, nor to events occurring outside the period specified above.

4. AEB exempts the IAC organizers from liability for any type of claim caused to a third party that is strictly related to the conduct or event resulting from AEB delegation in the AEB booth, except for those that have not been approved by a representative of the AEB delegation or are not under AEB direct control, as previously stated. Under the legislation of the Federative Republic of Brazil, AEB shall be responsible only for acts or omissions attributable to its representatives acting within the scope of their official duties in connection with the 77th International Astronautical Congress as specified above. AEB shall be liable for and shall indemnify any damages arising from the activities of its representatives and
