Reunião da Câmara Setorial da Carne Bovina do MAPA

5 de maio de 2026.

PRINCIPAIS PONTOS DISCUTIDOS:

1. Situação global da febre aftosa: 2.400 focos entre abril de 2025 e abril de 2026.
2. Plano Bienal 2026/2027: Programa Hemisférico de Erradicação da Febre Aftosa (PHEFA), com as diretrizes para a erradicação da doença no continente americano.
3. Banco Regional de Antígenos (BANVACO).
4. Estudos de análises de riscos na prevenção da febre aftosa.

RESOLUÇÕES COSALFA 52

POR FIM...

Nenhum país está blindado com relação a ocorrência de um surto de febre aftosa. É preciso estar preparado para lidar com uma situação de emergência sanitária de forma rápida e eficaz, a exemplo da Alemanha, em 2025. Isso exige:

- ✓ Plano de contingência robusto.
- ✓ Capacitação/treinamento do serviço veterinário oficial, colaboradores nas fazendas, etc.
- ✓ Realização de simulados.
- ✓ Recursos financeiros e recursos humanos.
- ✓ Banco de antígeno e/ou vacina, para a vacinação de emergência se for o caso.
→ Banvaco e banco nacional se complementam.
