

Re: 2nd Draft Standard on Chilli & Paprika

by [andre-bispo](#) » Fri Jan 05, 2018 9:32 am

All the best at 2018 for all! 😊

We came through last version and the comments made and would like to endorse comments made by:

Argentina (i.e., removal of pesticide residue method of analysis - rationale not to override another Codex Committee CCPR);

Chile (i.e., removal of the definition for chili power - rationale not to mislead consumers);

Egypt (i.e., 5.3 Dried Chili or/and Paprika shall be free from living insects and shall be practically free from molds, dead insects, insect fragments and rodent contamination visible to the naked eye (corrected, if necessary, for abnormal vision) or with such magnification as may be necessary in any particular case. - Rationale to revise previous decision as proved disastrous as proposed values are far above current trade practices and lower levels of filth are on the remit of CCFH); and

USA (i.e., consider adoption of the grouping format)

Those comments were not considered on the 2nd Draft and should be debated for a smooth consideration on next meeting.

Regards,

André Oliveira
