Cota Observada/Simulada/Prevista - Estação Caís Mauá C6 (87450004)

As informações referentes a previsão de níveis para o Guaíba e afluentes, e recomendações apresentadas a seguir foram elaboradas pelo Serviço Geológico do Brasil (SGB) em conjunto com o Grupo de Pesquisas de Hidrologia de Grande Escala do Instituto de Pesquisas Hidráulicas (HGE-IPH) da Universidade Federal do Rio Grande do Sul (UFRGS).

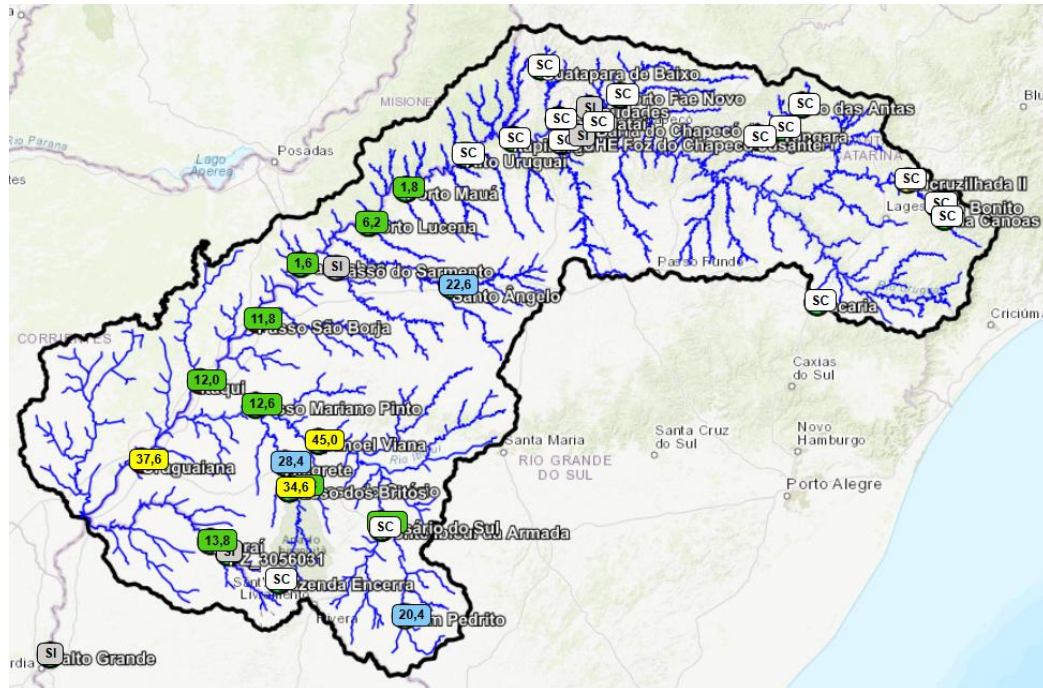

As previsões apresentadas neste boletim são baseadas em modelos hidrológicos e estão sujeitas às incertezas inerentes à modelagem hidrológica, mas, principalmente, às incertezas das previsões meteorológicas utilizadas como dados de entrada. A elevada divergência entre os modelos meteorológicos resulta em diferenças significativas entre os cenários hidrológicos simulados.
