# Overview

- About Wellcome
- Why we support ORCID
- Current integrations
- Future plans
- Questions

# Wellcome Trust

- We are a global foundation dedicated to supporting research with the goal of improving health
- Our funding supports over 14,000 people in more than 70 countries.
- In the next five years, we aim to spend up to £5 billion helping thousands of curious, passionate people all over the world explore ideas in science, population health, medical innovation, the humanities and social sciences and public engagement
- Strong commitment to open research
- Robert Kiley – Member of the ORCID Board of Director's

# Why Wellcome supports ORCID

- Wellcome has supported ORCID since its inception in 2010
- We want to be able to unambiguously track the research outputs which arise from our funding
  - a universal, unique researcher ID helps to facilitate this
- We want to reduce the burden on the research community in terms of applying for funding and reports on the outputs
- ORCID provides a means by which a grantee can get link all their outputs – articles, data, code, materials, peer review reports – helping to ensure that researcher assessment is not based on proxies like journal names

# Current integrations – Grant Tracker

- All researchers who wish to apply for funding must have an ORCID
- Our grant application system collects authenticated ORCID's and adds them to the grant application

Please complete the following form.

**Title**

**First Name**

**Middle name / initial**

**Last Name**

**Organisation**   
To select your organisation, begin typing its name and select from the list.

**Department**

**Division**

| Address Type           | Address  | Is Current                          |
|------------------------|--|-------------------------------------|
| Primary                | Wellcome Trust, 215 Euston Road, London, NW1 2BE, United Kingdom | <input checked="" type="checkbox"/> |
| <a href="#">add...</a> |  |                                     |

**ORCID ID**  [Add ORCID or register with ORCID](#)

**Date of Birth**

**Gender**

**Nationality**

**Ethnicity and Disability**  
The Wellcome Trust collects information on ethnicity and disability solely for equal opportunities evaluation and monitoring

As part of your registration you can include an ORCID ID. If you are the lead applicant, you will need to enter your ORCID ID to be able to submit an application to us. Please note, lead applicants for Engaging Science applications do not need to enter an ORCID ID. ORCID is a not-for-profit initiative that has established a global, open registry to provide persistent, unique identifiers for researchers and contributors to research and associated funded activity. If you would like to register for an ORCID ID or would like to learn more, please visit: <http://orcid.org>.

# Wellcome Open Research

- Wellcome has launched its own publishing platform – Wellcome Open Research
- Can be used by our grantholders to publish *any* research output, in a fast, open, transparent, and cost effective way
- Corresponding author must have ORCID when submitting
- Peer reviews open – and these are linked to the reviewers ORCID record

The screenshot shows the homepage of the Wellcome Open Research platform. At the top, there is a navigation bar with the title 'Wellcome Open Research' and a search icon. Below the title are menu items: 'BROWSE', 'GATEWAYS', 'HOW TO PUBLISH', 'ABOUT', 'BLOG', 'MY ACCOUNT', and 'SIGN IN'. The main content area features the Wellcome logo (a white 'W' on a dark square) and the text 'Wellcome Open Research' in large white font. Below this is a subtitle: 'A new way for Wellcome-funded researchers to rapidly publish any results they think are worth sharing.' A prominent teal button with white text says 'SUBMIT YOUR RESEARCH'. At the bottom, there is a 'Browse Articles' section with a right-pointing arrow. Below this, three article cards are visible, each with a date and a title: '17 MAY 2018 Pulmonary epithelial barrier and immunological functions at birth and in ...', '16 MAY 2018 Surveillance and Epidemiology of Drug Resistant Infections Consortium (SEDRI...', and '16 MAY 2018 Intrathecal Immunoglobulin for treatment of adult patients with tetanus: A randomi...'. In the bottom right corner, it says 'Powered by F1000'.

# Wellcome Open Research(2)

METHOD ARTICLE

## Pulmonary epithelial barrier and immunological functions at birth and in early life - key determinants of the development of asthma? A description of the protocol for the Breathing Together study [version 1; referees: awaiting peer review]

### How we integrate with ORCID

Wellcome Open Research complies with ORCID's integration and engagement program, Collect & Connect:

- we collect and store authenticated ORCID iDs for authors and referees
- we publicly display the iDs with the iD icon for those authors and referees, linked to their ORCID account
- we connect to the user's ORCID record and update it with new published works

[MORE INFORMATION](#) ▶

# Single Sign-on (SSO)

- A number of Wellcome systems make use of ORCID SSO including:
  - Wellcome Library
  - Wellcome Open Research
  - Europe PMC (the repository set up by Wellcome to manage research articles that arise from its funding)

# Supporting ORCID integration at Europe PMC

- Europe PMC – life science repository which has over 30m abstracts and 5m full text article
- Over 5m [papers](#) linked to at least 1 ORCID
- 760k unique ORCID's listed in EPMC
- ORCID used to create author profiles
- Working with THOR, working to get ORCID's into [data](#) submission systems

# Future plans

# Pulling data from ORCID

- Working with the supplier of our grants management system to pull in:
  - “Works” data - articles, data, code etc which researchers have linked to their ORCID record
  - CV data (education, previous grants etc)

**ORCID profile**

**Publication - Journal Article**

# Pushing data to ORCID

- Also exploring the idea of pushing grant data to ORCID
  - Reduces burden on researcher
  - Gives ORCID record greater authority

# Conclusion

- **ORCID becoming a key part of the research ecosystem**
- **It provides the means by which researchers can unambiguously claim all their outputs – and get credit for them**
- **Reduces the burden on all stakeholders and increases the accuracy of reporting**
