## CRITÉRIOS DE CLASSIFICAÇÃO QUALIS ENGENHARIAS III

### Introdução

A reunião de preparação do QUALIS das Engenharias III foi realizada entre os dias 18 e 20 de maio de 2015. Nesta reunião, foram classificados 2304 títulos de periódicos, nos quais foram reportadas publicações de artigos pelos Programas de Pós-Graduação da Área, nos anos de 2013 e 2014. A classificação nos estratos mais altos das Engenharias III é baseada em critérios quantitativos, que envolvem indicadores das bases JCR e Scopus. Os periódicos mais bem classificados pela Área são aqueles que constam da base JCR. Para a classificação destes, é usado um indicador que envolve o fator de impacto e a meia vida do periódico, assim como a mediana dos fatores de impacto das categorias declaradas pelo periódico na base JCR. A base de dados JCR usada foi a de 2013, que era a mais atualizada que se encontrava disponível na data da reunião.

A distribuição dos periódicos do QUALIS das Engenharias III é apresentada na figura 1.

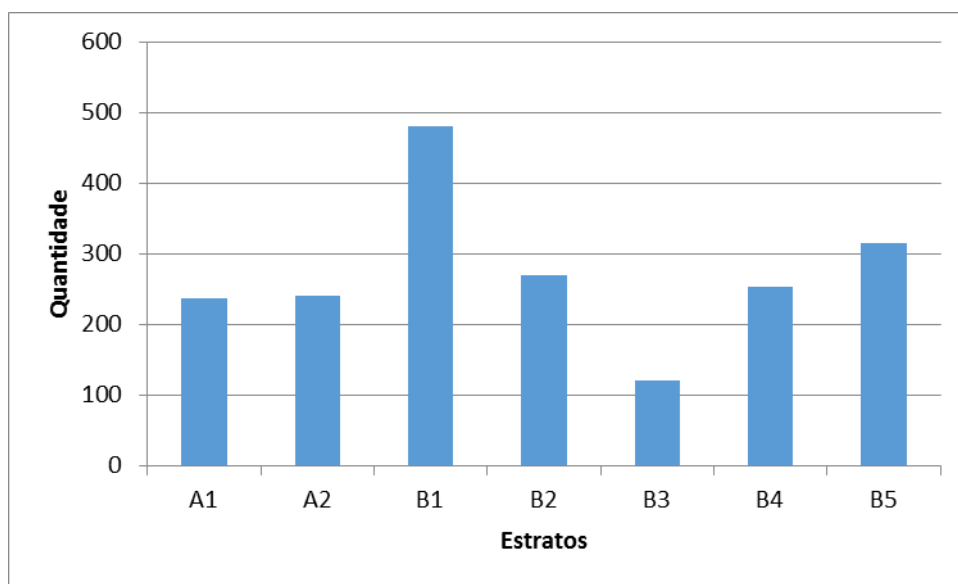

Figura 1. Distribuição dos periódicos do QUALIS das Engenharias III

## Metodologia para Classificação Geral

A partir da planilha fornecida pela CAPES, com a listagem dos periódicos com publicações de artigos por Programas de Pós-Graduação das Engenharias III nos anos de 2013 e 2014, foram montadas três outras planilhas, a saber:

- Planilha de periódicos que constam da base JCR;
- Planilha de periódicos que não constam da base JCR, mas que constam da base Scopus;
- Planilha de periódicos que não constam da base JCR nem da base Scopus.

Os periódicos que constam da base JCR foram ordenados de acordo com o seguinte indicador:

$$FIR' = \left( \frac{FI}{MFI} \right) \left( 1 + \frac{MV}{MV_{\max}} \right)$$

onde

FI = Fator de impacto do periódico;

MFI = Mediana dos fatores de impacto medianos das categorias declaradas por cada periódico;

MV = meia vida do periódico. Este valor é truncado em 9,99 anos.

$MV_{\max}$  = dobro da mediana da meia vida dos periódicos do QUALIS das Engenharias III, que constam da base JCR.

Os periódicos que constam da base Scopus, mas não constam da base JCR, foram ordenados de acordo com o indicador SJR.

Os periódicos que não constam da base JCR nem da base Scopus foram manualmente classificados nos estratos B4, B5 e C, a partir da análise de suas abrangências, políticas editoriais e corpos editoriais.

A partir das três planilhas dos três grupos de periódicos referidos acima, foi montada uma única planilha para classificação dos periódicos das Engenharias III, referente aos anos de 2013 e 2014. Esta planilha é apresentada no Apêndice A. A classificação dos periódicos teve como base os seguintes critérios:

- Periódicos indexados na base de dados JCR foram classificados nos estratos A1 a B2, em ordem decrescente do indicador FIR'.
- Periódicos indexados na base Scopus, e que não integram a base JCR, foram classificados nos estratos B2 e B3, em ordem decrescente do indicador SJR.
- Periódicos científicos de abrangência nacional ou internacional que não integram as bases JCR ou Scopus, mas que tenham política editorial bem definida, com Corpo Editorial qualificado, foram classificados no estrato B4.
- Periódicos científicos de abrangência regional, com política editorial bem definida, foram classificados no estrato B5.

- Periódicos não científicos foram classificados no estrato C.
- Os títulos foram classificados nos estratos de A1 a B2, satisfazendo as restrições:
  - Número de periódicos A1 < Número de periódicos A2;
  - Soma dos periódicos A1 e A2 < 25% do número total dos periódicos da área;
  - Soma dos títulos A1, A2 e B1 < 50% do número total dos periódicos da área.

Após a classificação dos periódicos, foi feita correspondência entre a planilha gerada pela Área das Engenharias III (com o conjunto de periódicos de 2013 e 2014) e as duas planilhas geradas pela Plataforma Sucupira. Estas últimas planilhas foram carregadas na Plataforma Sucupira pelo Coordenador da Área, após o fim da reunião.

**A Área das Engenharias III esclarece que:**

- as duas planilhas geradas pela Plataforma Sucupira têm, em cada uma, os periódicos com publicações em 2013 e em 2014 separadamente, e não o conjunto total de periódicos destes dois anos com o qual foi realizada a classificação, seguindo os critérios apresentados acima.**
- a verificação dos percentuais estabelecidos para os estratos A1, A2 e B1 é feita pela Plataforma Sucupira para as planilhas referentes aos anos de 2013 e de 2014, separadamente.**

Assim, serão encontradas pequenas alterações nas classificações de alguns periódicos na Plataforma Sucupira, em relação à planilha apresentada no Apêndice A deste relatório. Estas alterações são provisórias, até que a Plataforma Sucupira seja corrigida para a verificação dos percentuais dos estratos A1, A2 e B1 do conjunto total de periódicos do período de avaliação. De qualquer forma, o Qualis será ainda atualizado até a realização da avaliação quadrienal.

**Outros critérios adotados**

- Periódicos que tiveram troca de nome ao longo do triênio foram classificados no mesmo estrato, sendo este aquele de melhor classificação;
- Periódicos que apresentam versões impressa e online tiveram as duas versões classificadas no mesmo estrato, sendo este aquele de melhor classificação;
- Periódicos suspensos do JCR por *self cite* ou *steking* (lista em [http://admin-apps.webofknowledge.com/JCR/static\\_html/notices/notices.htm](http://admin-apps.webofknowledge.com/JCR/static_html/notices/notices.htm), consultada 15 de maio de 2015) foram classificados no estrato C;
- Periódico sem editor ou corpo-editorial bem definidos, com missão incongruente com seu título, com título que não reflita sua origem geográfica, sem política clara de revisão e aceitação dos artigos, que falsamente declare indexação, que não tenha ISSN, que tenha vários ISSN, ou que tenha outras características que permitam julgá-lo sem rigor científico, foi classificado no estrato C;
- Títulos que não correspondiam a periódicos, como por exemplo, *proceedings*, *series* e *magazines*, foram classificados no estrato C;

**Comitê Avaliador**

<b>NOME</b>	<b>INSTITUIÇÃO DE ENSINO</b>
