NATIONAL CODIFICATION BUREAU OF THE CZECH REPUBLIC

ORGANISATION

The Czech NCB is an integral part of Defence Standardization, Codification and Government Quality Assurance Authority ("DSCGQA Authority"), directly subordinated to the State Secretary of the Ministry of Defence of the Czech Republic, located in the capital of the Czech Republic – Prague.

Czech NCB is staffed by 10 personnel – all civilians.

AIM

- to manage national Uniform Codification System in conformity with the NATO Codification System based on rules, regulations and procedures set down in AC/135;
- to provide and support the codification activities on the national and international level;
- to support users of Uniform Codification System;
- to support Czech Military Industry;
- to provide training of the subjects participating in codification processes (industry, acquisition authorities, logistics, end users, codifiers);
- to develop and provide national handbooks and national tools for codification;
- to maintain and update Total Item Record and System Support Record for each codified item of supply;
- to constantly improve the data quality of Uniform Codification System.

HISTORY OF THE CZECH CODIFICATION ACTIVITIES

Year	Event Description
1993	Establishment of the Codification Department.
1994	1 st visit to NAMSA.
1996	Sponsorship Agreement between AC /135 NATO and MoD of the Czech Republic.
1997	Product specification of ISL and MC Catalogue.
1998	Start of the test running of Information System of Logistics (ISL) and MC Catalogue.
1999	The Czech Republic is a new member of NATO. Start of the routine operation of MC Catalogue in ISL on the national level. Start of the testing of MC Catalogue by NCB Germany.
2000	Start of NADEX and routine codification. Approval of the Governmental Act No. 309/2000 Sb. on Defence Standardization, Codification and Government Quality Assurance.

2010	Extension of Codification Contract Clause with images (for all material designated for codification).
2019	Start of the new codification SW project WEB-KAT to fulfil AC/135 demands for codification based on NATO Data Exchange Redesign (NDER) Project.
2020	NDER Compliance Tests under the management of NSPA.
2022	Launching of WEB-KAT with NDER implementation.

CODIFICATION SOFTWARE SOLUTION

WEB-KAT is based on MC Catalogue with modified workflow for national specifics and NDER implementation. WEB-KAT is operated in the Internet environment. WEB-KAT is constantly improved by new functionalities. Software tool is a product of AURA Ltd., Brno, Czech Republic.

CZE NCB is a member of MC Catalogue User Group to coordinate steps and users demands for development of MC Catalogue SW.

Basic characteristics

- widely available information system;
- application with controlled user access;
- servers under military security administration;
- direct access for suppliers and cataloguing agencies;

- automated database update of manufacturers from government servers;
- allows direct connection to AC135 servers for information exchange.

Technological characteristics

Operational system:	CentOS 9 Linux
Database system:	PostgreSQL
Development environment:	JAVA
Communication protocols:	TCP/IP
MC Catalogue version:	7.05.187

RATIFIED STANDARDISATION AGREEMENTS

STANAG 3150	Codification of equipment – Uniform system of supply classification
STANAG 3151	Codification of equipment – Uniform system of item identification
STANAG 4177	Codification of items of supply – Uniform system of data acquisition
STANAG 4199	Uniform system of exchange of materiel management data
STANAG 4438	Codification of equipment – Uniform System of Dissemination of Data Associated with NATO Stock Numbers
