Safety Data Sheet

CBPA-1

1 – MATERIAL AND COMPANY IDENTIFICATION

CRM code	CBPA-1
CRM name	Copper Sulfide Ore (Sossego, Pará)
Product intended use	This certified reference material (CRM) is intended for use in calibration of a measurement system, assessment of a measurement procedure, quality control and value assignment to materials with similar matrices. A unit of CBPA-1 consists of 135 g of powdered material packaged under nitrogen atmosphere in a glass bottle and vacuum sealed in a laminated aluminum foil cromopel pouch.
Producer information	Center for Mineral Technology - CETEM Certified Reference Material Program - PMRC Av. Pedro Calmon, 900 – Ilha da Cidade Universitária 21941-908 – Rio de Janeiro – RJ Brazil Telephone / Fax: 55 21 3865-7310 / 55 21 2290-9196 E-mail: pmrc@cetem.gov.br Website: http://www.cetem.gov.br/crm

2 – HAZARDS IDENTIFICATION

Classification:	
▪ Physical hazard	Not classified.
▪ Health hazard	Not classified.
Label elements:	Not applicable.
▪ Symbol	No symbol or pictogram.
▪ Signal word	No signal word.
▪ Hazard statement(s)	Not applicable.
▪ Precautionary statement(s)	Not applicable.
▪ Hazards not otherwise classified	Not applicable.
▪ Ingredients with unknown acute toxicity	Not applicable.

3 – COMPOSITION AND INFORMATION ON INGREDIENTS

Substance/Mixture	Copper sulfide ore (0,98 % Cu).
Other designation	Not applicable.
Component	The major minerals are quartz, amphiboles, chlorite, plagioclase and magnetite. Chalcopyrite, pyrite and fluorapatite were identified as minor minerals.
CAS N°	69012-52-8

The Certificate of Analysis reports the concentrations of the individual constituents as oxides and elements. The oxides and elements are not freely available in the material as sold. The health and safety information provided in this SDS are for copper sulfide ore, not for its individual constituents. This material does not contain free crystalline silica, quartz; silicon oxide is present but in form of silicates.

4 – FIRST AID MEASURES

Description of first aid measures:	
▪ Inhalation	If adverse effects occur, remove to uncontaminated area. If not breathing, give artificial respiration or oxygen by qualified personnel. Seek immediate medical attention.
▪ Skin contact	Wash skin with soap and water.
▪ Eye contact	Flush eyes with water for at least 15 minutes. If necessary, seek medical attention.
▪ Ingestion	If adverse effects occur after ingestion, seek medical treatment.
Most important symptoms and effects, acute and delayed	Exposure may cause mechanical irritation.
Indication of any immediate medical attention and special treatment needed, if necessary	If any of the above symptoms are present, seek medical attention if needed.

5 – FIRE FIGHTING MEASURES

Fire and explosion hazards	Negligible fire hazard. Avoid generating dust. The material is not flammable, explosive or combustible.
Extinguishing media	Regular dry chemical, carbon dioxide, water, regular foam.
Specific hazards arising from the chemical	None listed.
Special protective equipment and precautions for fire-fighters	Avoid inhalation of material or combustion byproducts. Wear full protective clothing and a self-contained breathing apparatus.

6 – ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures	Any accumulated material on surfaces should be removed and properly disposed of. Use suitable personal protective equipment (see section 8).
Measures for environmental protection	Keep out of water supplies and sewers.
Methods and materials for containment and clean up	Collect spilled material in appropriate container for disposal. Keep unnecessary people away, isolate hazard area and deny entry.

7 – HANDLING AND STORAGE

Safe handling precautions	Minimize dust generation and accumulation on surfaces. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Use suitable personal protective equipment (see section 8) Avoid contact with incompatible materials (see section 10).
Storage	The material must be stored in its original package, at room temperature in a clean and dry place. The bottle must be opened only during sampling and kept in a desiccator under vacuum or vacuum sealed in a laminated aluminum foil pouch to minimize oxidation and moisture absorption.

8 – EXPOSURE CONTROLS AND PERSONAL PROTECTION

Exposure limits	No occupational exposure limits have been established for copper sulfide ore. This material is a particulate matter and adequate inhalation/respiratory protection should be used to minimize exposure. The exposure limits for Particulates Not Otherwise Regulated (PNOR) are applicable. OSHA (PEL) 15 mg/m ³ (TWA, total particulates not otherwise regulated); 5 mg/m ³ (TWA, respirable particulates not otherwise regulated).
Engineering controls	Provide local exhaust or process enclosure ventilation system. Ensure compliance with applicable exposure limits.
Personal equipment	Wear appropriate Personal Protective Equipment (PPE) to minimize exposure to this material.

Respiratory protection	If workspace conditions warrant respirator, wear adequate respirators against dust when handling the material.
Eye/face protection	Wear safety goggles with face shields. An eye wash station should be readily available near areas of use.
Skin and body protection	Personal protective equipment for the body should be selected on the task being performed and the risks involved. Chemical-resistant gloves should be worn at all times when handling chemicals.
9 – PHYSICAL AND CHEMICAL PROPERTIES	
Appearance	Powder / pale brown color.
Odor	Odorless.
pH	Not applicable.
Melting point / freezing point (°C)	Not available.
Initial boiling point and boiling range	Not applicable.
Flash point (°C)	Not available.
Evaporation rate	Not applicable.
Flammability	Not flammable.
Explosive limits (% volume)	Not available.
Vapor pressure	Not available.
Vapor density (air=1)	Not available.
Density (specific gravity)	2.89 g/cm ³
Solubility in water at 20°C	Insoluble.
Partition coefficient (n-octanol/water)	Not available.
Autoignition temperature	Not available.
Thermal decomposition	Not available.
Viscosity (cP)	Not applicable.
Radioactivity	Not available.
Nominal particle size	<0.075mm.
10 – STABILITY AND REACTIVITY	
Reactivity	Non-reactive.
Chemical stability	Stable at normal temperatures and pressure.
Possible hazardous reactions	None listed.
Conditions to avoid	Avoid generating dust. Avoid heat, flames, sparks, and other sources of ignitions. Avoid contact with incompatible materials.
Incompatible materials	Acids, oxidizing agents and peroxides.
Hazardous products of decomposition	Thermal decomposition will produce miscellaneous compounds.
11 – TOXICOLOGICAL INFORMATION	
Route of exposure	Inhalation and skin.
Symptoms related to the physical, chemical and toxicological characteristics	May aggravate respiratory disorders.
Potential health effects (acute, chronic and delayed):	
▪ Inhalation	Irritation and difficulty breathing.
▪ Skin contact	May cause mechanical irritation.

▪ Eye contact	May cause irritation or eye damage.
▪ Ingestion	No data available on significant adverse effects.
Numerical measures of toxicity:	
▪ Acute toxicity	Not classified, no data available.
▪ Skin corrosion / irritation	Not classified, no data available.
▪ Serious eye damage / eye irritation	Not classified, no data available.
▪ Respiratory sensitization	Not classified, no data available.
▪ Skin sensitization	Not classified, no data available.
▪ Germ cell mutagenicity	Not classified, no data available.
▪ Carcinogenicity	Not classified, no data available.
▪ Listed as a carcinogen / potential carcinogen	Not listed.
▪ Reproductive toxicity	Not classified, no data available.
▪ Specific target organ toxicity, single exposure	Not classified, no data available.
▪ Specific target organ toxicity, repeated exposure	Not classified, no data available.
▪ Aspiration hazard	Not applicable.
12 – ECOLOGICAL INFORMATION	
Ecotoxicity Data	No data available.
Persistence and degradability	No data available.
Bioaccumulation potential	No data available.
Mobility in soil	No data available.
Other adverse effects	No data available.
13 – DISPOSAL CONSIDERATIONS	
Waste disposal	Dispose of waste in accordance with local, state and federal regulations.
Disposal of empty packages	The empty package, after being thoroughly cleaned and decontaminated, may be reused or recycled.
14 – TRANSPORT INFORMATION	
Transportation requirements	The material is not regulated by national or foreign transportation requirements. The product is not classified as dangerous for transportation. Classify the packaged as FRAGILE (glass bottle).
15 – REGULATORY INFORMATION	
Specific regulations	Not applicable.
16 – ADDITIONAL INFORMATION	
<p>This SDS was prepared according to ABNT NBR 14725-4:2014 – Chemicals – Information about safety, health and environment. Part 4: Safety Data Sheet (SDS) for chemicals; and on the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) – 6ª ed.: UNO, 2015.</p> <p>Key and Legend: CAS – Chemical Abstracts Service.</p> <p>Disclaimer: This SDS provides information based on the current level of knowledge only for use in assessing the hazardous nature of the material and safety measures. The certified values for this material are given in the Certificate of Analysis.</p> <p>Users of CBPA-1 certified reference material should ensure that the SDS in their possession is current. This can be accomplished by contacting CETEM: (55 21) 3865-7310, fax (55 21) 2290-9196, e-mail pmrc@cetem.gov.br; or downloading it from the website http://www.cetem.gov.br/mrc.</p>
