

CENTENA

CENTRO TECNOLÓGICO
NUCLEAR E AMBIENTAL

CENTENA: A Center of security and sustainability for Brazil

CENTENA will be a center responsible for promoting sustainability of nuclear area through development of technologies in radioactive waste management and disposal of radioactive waste, ensuring safety and security for the public and the environment.

CENTENA

**Brazil's Nuclear
Power Plants -
Angra 1 and 2**

**Medicine and
Research**

**Agriculture and
environment**

**Energy and
Industries**

Vision

To be a worldwide reference in disposal and technological development in radioactive waste management.

Values

CENTENA is committed to security, quality, transparency, respect, ethics and sustainability.

CENTENA is an initiative of the Brazilian Federal Government, through the Ministry of Science, Technology and Innovation and the National Nuclear Energy Commission, as a solution for the radioactive waste management in our country.
