* A partir deste Alerta Tecnológico, além do número seqüencial de todos os alertas publicados (nº62), constará, também, o número relativo ao assunto específico de cada alerta, após seu título. Neste caso: “Pedidos de Patente sobre Células Tronco – nº 7”.

1. INTRODUÇÃO

1.1 ALERTA TECNOLÓGICO

O Instituto Nacional da Propriedade Industrial (INPI) é uma Autarquia Federal, vinculada ao Ministério do Desenvolvimento, Indústria e Comércio Exterior (MDIC), responsável pela concessão de patentes, registros de desenhos industriais, registro de marcas, averbação de contratos de transferência de tecnologia, registro de programas de computador, indicações geográficas e topografias de circuito integrado.

O Centro de Disseminação da Informação Tecnológica (CEDIN), subordinado à Diretoria de Cooperação para o Desenvolvimento (DICOD), mantém um acervo com a descrição dos pedidos de patente e de registros de desenhos industriais. Uma de suas atribuições é divulgar e disseminar a utilização destas informações bibliográficas e técnicas. Para tanto, o CEDIN dispõe da Coordenação de Estudos e Programas – CEPRO, cuja incumbência é elaborar publicações fundamentadas, essencialmente, em informações extraídas de documentos de patente.

A patente é uma importante fonte formal de informação, por meio da qual se pode ter acesso a detalhes técnicos de invenções que, em alguns casos, não estão descritos em outros meios de divulgação¹ (livros, artigos técnicos etc.).

O objetivo desta publicação, de periodicidade semestral, é o de alertar sobre os depositantes mais expressivos em determinado período, os países onde o primeiro depósito foi solicitado (país de prioridade), as áreas tecnológicas mais solicitadas, e de divulgar os títulos dos pedidos de patente publicados mundialmente em determinado período, permitindo, desta forma, a atualização periódica de seu público alvo.

Um pedido de patente é constituído de uma folha de rosto, do relatório descritivo da invenção, das reivindicações (quadro reivindicatório), dos desenhos (se necessário) e do resumo. A folha de rosto contém os dados bibliográficos do pedido de patente, tais como, os nomes dos depositantes e dos inventores, as datas e os números de depósito, de publicação e de prioridade do pedido, a classificação internacional, o título e o resumo da invenção, entre outros.

Os dados bibliográficos e a cópia completa do pedido de patente podem ser obtidos nas seguintes bases de patente disponíveis, gratuitamente, na internet:

¹ Hong, Soonwoo. **The Magic of Patent Information**, Disponível em:
<http://www.wipo.int/sme/en/documents/patent_information.htm#basics>. Acesso em 10 de outubro de 2008.

3. Base do Escritório Americano de Patentes⁴: <http://uspto.gov>

Caso haja interesse em se conhecer o(s) depósito(s) de patente no Brasil, correspondente(s) (família do pedido de patente⁵) aos pedidos de patente estrangeiros listados no Anexo 1, sugere-se uma busca de família dos pedidos de interesse. Neste caso, o Centro de Documentação do INPI – CEDIN informará os procedimentos a serem seguidos. Abaixo, seguem endereço e formas de contatar o CEDIN.

Tel. (21) 3037 3101, Fax. (21) 3037 3354

e-mail: cedin@inpi.gov.br

As cópias integrais dos pedidos de patente de interesse também podem ser solicitadas por meio do endereço copdocpat@inpi.gov.br ou por correio postal ao endereço anteriormente mencionado.

² Esta base contém somente pedidos de patente depositados e publicados no Brasil a partir de 1982.

³ Contêm pedidos de patente depositados e publicados em mais de 70 países.

⁴ Contêm pedidos de patente depositados ou concedidos e publicados apenas nos Estados Unidos.

⁵ Uma família de patentes é uma coleção de documentos de patente relacionados à mesma invenção ou a invenções correlacionadas, publicados em diferentes países. Cada documento de patente da família baseia-se, normalmente, nos dados do primeiro pedido depositado no país da prioridade. Existem diferentes estruturas de famílias de patente. Para este Alerta, o termo família de patente refere-se ao conceito de “família simples”, na qual todos os documentos de patente têm em comum o número e a data da prioridade unionista (WIPO, 2008).

2. PEDIDOS DE PATENTE SOBRE CÉLULAS-TRONCO

As células-tronco são células capazes de se diferenciar nos tecidos que compõem o corpo humano. Estas células são, hoje, objeto de intensas pesquisas, dada a vasta gama de aplicações terapêuticas que podem advir de seu uso. O tratamento de doenças cardiovasculares, neurodegenerativas – como Alzheimer e Parkinson -, nefropatias, diabetes tipo I, doenças hematológicas, imunodeficiências e traumas da medula espinhal são alguns dos exemplos dessas aplicações.

As células-tronco podem ser classificadas em **células embrionárias** ou **células adultas**, as primeiras sendo capazes de se diferenciar em maior número de tecidos.

As fontes de células-tronco mais utilizadas hoje no mundo são os embriões recém-fecundados (blastocistos), criados por fertilização *in vitro* e que não serão empregados no tratamento de infertilidade; os embriões criados por clonagem; as células germinativas ou órgãos de fetos abortados; o sangue retirado do cordão umbilical no momento do nascimento; alguns tecidos adultos, como a medula óssea; e algumas células maduras de tecido adulto, reprogramadas para se comportarem como células-tronco. Há que se destacar a discussão ética, e bastante polêmica, com relação à destruição de embriões recém-fecundados e, principalmente daqueles produzidos por clonagem, para a obtenção de células-tronco.

Em muitos países, as descobertas relacionadas às possíveis aplicações terapêuticas destas células foram divulgadas pela mídia de forma sensacionalista e recebidas com festa pela sociedade. Entretanto, a realidade parece não ser bem esta. Em primeiro lugar, o estágio de desenvolvimento em que se encontram determinadas linhas de pesquisa com esta tecnologia dificilmente permitirão que os cientistas respondam à sociedade no tempo esperado e com a qualidade dos resultados que se prevê; e, um segundo aspecto já abordado se refere às grandes questões éticas envolvidas na destruição de embriões para a obtenção das células-tronco.

Diante do cenário apresentado e da escassez de levantamentos relacionados aos depósitos de patente sobre células-tronco no mundo, o INPI vem, por meio do CEDIN, facilitar ao público interessado o acesso a estas informações.

Dessa forma, este Alerta Tecnológico tem como objetivo divulgar, a cada semestre, os novos pedidos de patente sobre células-tronco (suas aplicações terapêuticas, técnicas relacionadas a seu isolamento, purificação, cultivo e diferenciação etc.) publicados no mundo.

Para o levantamento em questão, foram selecionados os documentos de patente contendo, em seu título e/ou resumo, uma (ou mais) das seguintes palavras-chave: **stem cell**, **célula(s)-tronco**, **célula(s) tronco** e **célula(s) madre(s)**.

2.1 CLASSIFICAÇÃO INTERNACIONAL DE PATENTES – CIP

O sistema da Classificação Internacional de Patentes resultou dos esforços conjuntos de órgãos de propriedade industrial de vários países, com o objetivo de dispor, de forma organizada e padronizada, os documentos de patente, a fim de facilitar o acesso (busca) às informações tecnológicas e legais contidas nesses documentos. O Acordo de Estrasburgo relativo à Classificação Internacional de Patentes (CIP), concluído em 1971, entrou em vigor em 1975 e é administrado pela Organização Mundial da Propriedade Intelectual (OMPI). Qualquer país membro da Convenção da União de Paris pode se tornar membro do Acordo de Estrasburgo. A CIP é uma ferramenta uniforme e utilizada por diversos países e organizações com o objetivo de facilitar a recuperação de documentos de patente.

São signatários do Acordo de Estrasburgo 61 Estados⁶. No entanto mais de 100 escritórios nacionais, 4 escritórios regionais e a Secretaria da OMPI - atuando como escritório receptor do Tratado de Cooperação em Patentes (PCT), também utilizam a CIP.

A cada ano a CIP é revisada de acordo com sugestões discutidas e acordadas pelos representantes dos países signatários. A edição atualizada é disponibilizada no *site* da OMPI (<http://www.wipo.int/classifications/ipc/>) e no *site* do INPI (<http://pesquisa.inpi.gov.br/ipc/index.php>).

De forma a complementar a estratégia de busca para recuperação dos documentos de patente referentes a células-tronco, foram empregadas as seguintes CIPs: **C12N5/0735**, relacionada a células-tronco embriônicas e células germinativas embriônicas; **C12N5/074**, referente a células-tronco adultas; **C12N5/0775**, correspondente a células-tronco mesenquimais e a células-tronco provenientes de tecido adiposo; **C12N5/0789**, relacionada a células-tronco provenientes de sangue ou que compõem o sistema imunológico; **C12N5/0797**, que engloba células-tronco neurais; e **C12N5/095**, referente a células-tronco tumorais.

É importante ressaltar que os Alertas Tecnológicos anteriores, publicados sobre o tema, não levaram em consideração a classificação internacional de patentes (CIP) para

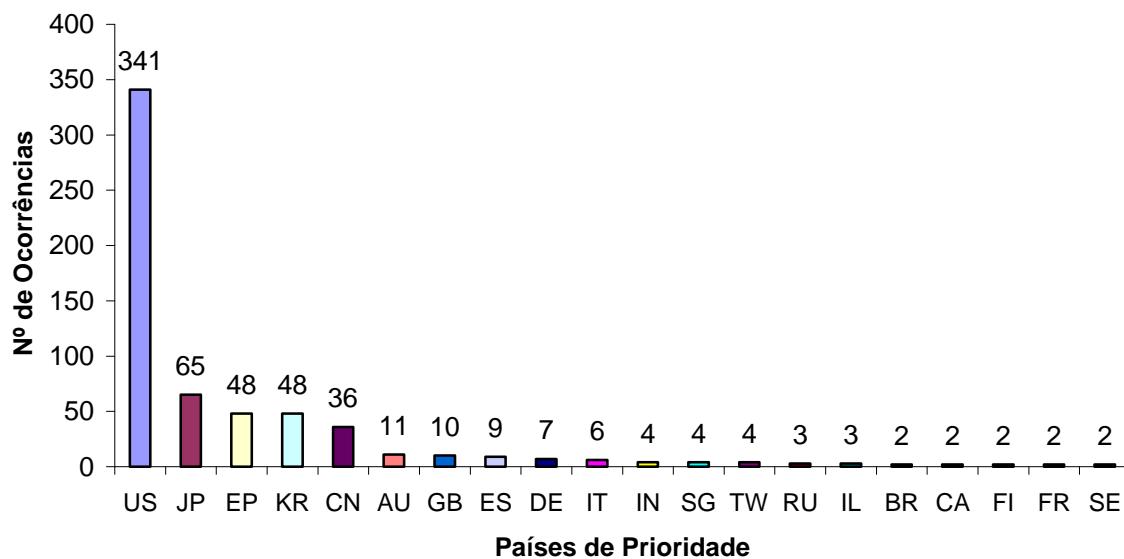

⁶ Fonte: http://www.wipo.int/treaties/en>ShowResults.jsp?lang=en&search.what=B&bo_id=19. Acesso em 25/08/2011.

recuperação dos documentos de interesse. Até então, as estratégias de busca empregaram somente palavras-chave, dada a inexistência de CIPs específicas para o assunto. Em janeiro de 2010, a revisão da classificação internacional de patentes passou a incorporar novas CIPs referentes a células-tronco. Desta forma, fez-se a opção por incluí-las na estratégia de busca para recuperação dos documentos, a fim de aumentar a precisão do resultado final.

3. RESULTADOS

No semestre pesquisado, foram selecionados **568** documentos de patente que abordam tecnologias relacionadas a células-tronco. De acordo com o gráfico 1, podem-se visualizar os códigos dos países⁷ de prioridade dos pedidos de patente recuperados no período e a ocorrência em cada um dos países (o país de prioridade é o local onde foi feito o primeiro depósito do pedido de patente no mundo para uma determinada tecnologia). Ressalta-se que o depositante pode solicitar a prioridade de seu pedido de patente em um país diferente do país de sua residência.

Gráfico 1: Prioridade dos Pedidos de Patente recuperados

Fonte: Base de dados do Escritório Europeu de Patentes. Acesso em 10/02/2012.

⁷ A lista com os códigos dos países está disponível no Anexo I.

De acordo com o gráfico 1, os escritórios de patente onde foram realizados o primeiro depósito⁸ de patente referente à tecnologia (com duas ou mais ocorrências), são os seguintes: Estados Unidos da América (US), com 341 ocorrências; Japão (JP), com 65; Escritório Europeu de Patentes (EP) e Coréia (KR), ambos com 48; China (CN), com 36; Austrália (AU), com 11; Inglaterra (GB), com 10; Espanha (ES), com 9; Alemanha (DE), com 7; Itália (IT), com 6; Índia (IN), Singapura (SG) e Taiwan (TW), empatados com 4; Federação Russa (RU) e Israel (IL), com 3; e Brasil (BR), Canadá (CA), Finlândia (FI), França (FR) e Suécia (SE), cada um com 2 ocorrências. É importante destacar a liderança absoluta dos Estados Unidos e a expressão, também significativa e homogênea, de países como Japão, Coréia, e China.

Duas inferências podem ser estabelecidas a partir do gráfico 1: a de que as tecnologias estão sendo desenvolvidas, principalmente, nos países indicados, dado que, na maioria das vezes, os depositantes solicitam a prioridade a partir de seus países de origem; ou a de que há interesse pelo primeiro depósito nos mercados destes países.

⁸ Desta forma é estabelecida a prioridade unionista. Segundo este princípio estabelecido na Convenção da União de Paris, o **primeiro pedido de patente** depositado em um dos países membros serve de base para depósitos subsequentes relacionados à mesma matéria, efetuados pelo mesmo depositante ou seus sucessores legais.

Tabela 1: Relação dos depositantes e quantidade de pedidos de patente sobre células-tronco publicados no 1º semestre de 2011

Fonte: Base de dados do Escritório Europeu de Patentes. Acesso em 10/02/2012.

Depreende-se, da tabela 1, que os **10 depositantes** com mais pedidos de patente sobre células-tronco publicados no período analisado (University of Kyoto, Agency for Science, Technology and Research, Anthrogenesis Corporation, Wisconsin Alumni Research Foundation (WARF), Centocor Ortho Biotech, Geron Corporation, Osaka University, Osiris Therapeutics, University of Califórnia e Keio University) **são responsáveis por apenas 16% dos documentos** recuperados, o que indica que, no período analisado, as publicações de pedidos de patente relacionados a células-tronco no mundo estiveram bem distribuídas por diferentes instituições.

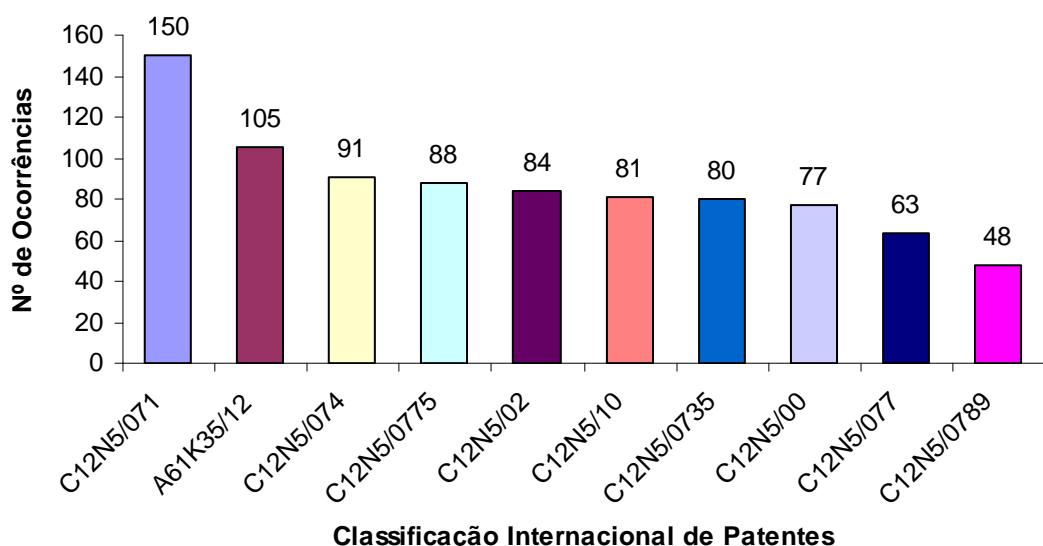

Seis dos dez depositantes com maior número de pedidos de patente no período em questão têm residência nos Estados Unidos; outros 3 são japoneses e 1 é residente em Singapura. Este cenário é, portanto, condizente com a primeira inferência feita a partir do gráfico anterior. Ou seja, de que as tecnologias estão sendo desenvolvidas, em sua maioria, nos países de origem dos depositantes.

Algumas das empresas identificadas entre os depositantes podem fazer parte de um mesmo grupo. Entretanto, para este alerta, os nomes dos depositantes foram apresentados da mesma forma como foram recuperados.

Entre os 568 documentos recuperados, 12 deles foram depositados no Brasil, dos quais 2 pertencem a brasileiros. Entre estes dois pedidos, o primeiro deles, BRPI0904515, foi depositado por duas universidades federais (Universidade Federal do Rio Grande do Sul - UFRGS e Universidade Federal do Rio Grande – FURG) e está relacionado a matrizes biodegradáveis compostas de micro e/ou nanofibras para desenvolvimento de suporte para células-tronco. O outro pedido (BRPI0903975), depositado em nome de uma brasileira (Sharon Lisauskas Ferraz de Campos), e se refere a processos de modificação de células-tronco embrionárias bovinas e de purificação de proteínas geradas a partir das referidas células. Os outros dez pedidos de patente sobre células-tronco foram depositados no Brasil por pessoas jurídicas ou físicas domiciliadas na Itália, na Dinamarca, na Alemanha, nos Estados Unidos, na Índia, no Japão, na Espanha e em Bahamas, o que parece indicar o interesse desses países no mercado brasileiro.

No gráfico 2, são apresentadas as principais classificações contidas nos pedidos de patente selecionados para este Alerta. Estas classificações permitem o monitoramento das tecnologias relacionadas ao tema, descritas nos pedidos de patente publicados no período.

Gráfico 2: Classificação Internacional de Patentes (CIP) dos Documentos sobre Células-tronco Publicados no 1º semestre de 2011

Fonte: Base de dados do Escritório Europeu de Patentes. Acesso em 10/02/2012.

Como já comentado, a partir de janeiro de 2010, foram inseridos, na Classificação Internacional de Patentes, vários subgrupos referentes a células-tronco. Do gráfico nº 2, depreende-se que das dez classificações listadas seis correspondem às novas CIPs criadas para agrupar documentos sobre o assunto. É possível observar que **150** documentos de patente, que contém a classificação C12N 5/071⁹ (“Células ou tecidos de vertebrados, por ex., células ou tecidos humanos”), descrevem matéria relacionada a **células ou tecidos humanos**; outros **105**, classificados como A61K 35/12 (“Materiais derivados de mamíferos ou pássaros”), estão, em sua maioria, relacionados a **células-tronco provenientes de mamíferos**. Destaca-se, também, a presença de **91 documentos** de patente com classificação C12N 5/074¹⁰, que correspondem a **células-tronco adultas**; **88** documentos classificados como C12N 5/0775¹¹, que tratam especificamente de **células-tronco mesenquimais ou de células-tronco derivadas do tecido adiposo**; **84** referentes a **propagação e manutenção de células-tronco e seus meios de cultura** (C12N 5/02); **81** descrevem a **modificação genética de células-tronco** (C12N 5/10); **80** relacionados a **células-tronco embrionárias** (C12N 5/0735¹²); **77** relatam **células não diferenciadas ou tecidos de seres humanos, animais ou plantas, suas culturas e meios de cultura e manutenção** (C12N 5/00); **63** documentos, classificados em C12N 5/077¹³, retratam **células mesenquimais** (células ósseas, cartilaginosas, do estroma de medula óssea, adipócitos ou miócitos); e, por fim, **48** pedidos de patente tem classificação C12N 5/0789¹⁴, classificação esta específica para **células tronco e células progenitoras multipotentes**.

⁹ Subgrupo novo, inserido na Classificação Internacional de Patentes a partir de janeiro de 2010.
